

Field	Description
Introduction	This activity diagram depicts the final stage of a job's lifecycle. It shows the Client's workflow for reviewing deliverables and authorizing the transfer of funds to the Freelancer.
Objectives	<ol style="list-style-type: none"><li>1. To visualize the decision process for accepting work or requesting revisions.</li><li>2. To define the trigger that moves money from the holding account to the user's wallet.</li><li>3. To ensure the job closure process includes a rating step.</li></ol>
Functional Requirements	<ol style="list-style-type: none"><li>1. The system must allow Clients to download or view submitted files.</li><li>2. The "Approve" action must be irreversible to protect the Freelancer.</li><li>3. The system must instantly credit the Freelancer's internal wallet upon approval.</li></ol>
Non-Functional Requirements	<p><b>Usability:</b> The interface should clearly distinguish between "Request Revision" and "Approve."</p> <p><b>Performance:</b> Wallet balance updates must happen in real-time.</p>
