

Field	Description
Introduction	This activity diagram illustrates the Admin's workflow for reviewing verification requests. It details the manual decision-making process required to validate a student's identity.
Objectives	<ol style="list-style-type: none"><li>1. To visualize the Admin's steps in accessing the verification queue.</li><li>2. To define the criteria for "Approving" or "Rejecting" a submission.</li><li>3. To link the Admin's decision to system updates (Status change, Notification).</li></ol>
Functional Requirements	<ol style="list-style-type: none"><li>1. The system must display the uploaded ID image alongside the user's profile name.</li><li>2. The Admin must be able to click "Approve" (granting a badge) or "Reject" (requiring a reason).</li><li>3. The system must notify the user of the outcome immediately.</li></ol>
Non-Functional Requirements	<p><b>Security:</b> Only users with the "Admin" role can access this interface.</p> <p><b>Efficiency:</b> The image loading process should be optimized for quick review.</p>
