

Field	Description
Introduction	<p>This activity diagram outlines the verification workflow for Freelancers (Students). It visualizes the steps of accessing the profile settings, selecting an ID document, and submitting it for review.</p>
Objectives	<p>1. To model the user interface flow for the verification feature.</p> <p>2. To define the validation checks applied to the uploaded file.</p> <p>3. To set the user's account status to "Pending" after submission.</p>
Functional Requirements	<p>1. The system must allow users to select image files (JPG/PNG) from their device.</p> <p>2. The system must enforce file size limits (e.g., max 5MB) to save storage.</p> <p>3. The system must display a success message and lock the submission until reviewed.</p> <p>Usability: The upload process should include a progress bar for better user experience.</p>
Non-Functional Requirements	<p>Privacy: Uploaded IDs must be stored in a restricted storage bucket, accessible only by Admins.</p>
