

Field	Description
Introduction	<p>This activity diagram outlines the process for a Freelancer to cash out their earnings. It visualizes the user interaction steps and the system's logic for validating the financial request.</p>
Objectives	<ol style="list-style-type: none"> 1. To model the user flow for selecting a withdrawal method (InstaPay/Wallet). 2. To define the logic check for sufficient funds.
	<ol style="list-style-type: none"> 3. To illustrate the feedback provided to the user (Success vs. Error).
Functional Requirements	<ol style="list-style-type: none"> 1. The system must display the user's current available balance. 2. The system must validate that the requested amount does not exceed the balance. 3. Upon confirmation, the system must create a "Pending" request for Admin review.
Non-Functional Requirements	<p>Usability: The interface must prevent errors by validating phone number formats.</p> <p>Accuracy: The system must prevent double-submissions of the same request.</p>
