Field	Description
Introduction	This activity diagram outlines the Freelancer's workflow for finding suitable projects. It covers the process of viewing the main feed, applying filters, and selecting a specific job card.
Objectives	1. To visualize the navigation path from the dashboard to the job details page.
	2. To define the filtering logic (search by keyword, budget, or category).
	3. To illustrate the decision points where a user chooses to apply for a specific job.
Functional Requirements	1. The system must display a paginated list of "Open" jobs by default.
	2. The system must allow users to refine results using input filters.
	3. Clicking a job card must retrieve and display the full job description and budget.
Non-Functional Requirements	**Performance:** The job feed must load in under 1 second, even with thousands of records.
	Responsiveness: The layout must adapt seamlessly to mobile and desktop screens.
