Field	Description
Introduction	This activity diagram outlines the workflow for a Client reviewing bids on their posted job, selecting a candidate, and initiating the hiring process.
Objectives	1. To visualize the Client's interaction with the proposal list. 2. To define the decision point where a Client chooses to "Accept" a specific freelancer. 3. To link the acceptance action to the payment deposit flow.
Functional Requirements	1. The system must display a list of all proposals linked to a specific job. 2. The system must allow the Client to view full details (cover letter, price) of any bid. 3. Accepting a proposal must lock the bid and trigger the payment process.
Non-Functional Requirements	**Usability:** The list should be sortable by price or rating for efficiency. **Data Accuracy:** The displayed proposal data must reflect the latest real-time submissions.
